Drill Permits Received for Wakefield Lakes Zinc Property, Saskatchewan

November 13, 2007, Vancouver, BC -- Les Kjosness, President, reports that drill permits have been received regarding the exploration program at the Company's Wakefield Lakes zinc property, Saskatchewan. The program entitles the Company to drill at 21 sites with one to five drill holes per site. The first phase of the program which will begin in December 2007 is for seven drill sites; however, up to five drill holes per site are permitted. A new all-weather road #995 is being built by the Saskatchewan Government through the mineral claims held by Golden Arch Resources, and will provide year-around access to the property. Golden Arch's drill contractor will begin the immediate preparation of the drill sites.

The Company plans to:

- verify the results attained by Falconbridge;
- extend the known George Lake zinc deposit, which is open in all directions; and,
- explore at least two other undeveloped deposits on the same trend that were indicated by previous drilling.

Wakefield Lakes is located approximately 300 kms northeast of La Ronge, Saskatchewan, 15 kms east of the Saskatchewan all weather road #905. Previous drilling by Falconbridge indicates the possibility of a core-zone of mineralization grading greater than 5% zinc. The Wakefield Zone is approximately eight km long and is generally unexplored. However, a limited detailed drilling program on the George Lake Zone is the basis of **an historically published resource of 2.9 million tons at 3.67% zinc and 0.53% lead, using a 2% zinc cut-off.** (verification of these Mineral Reserves has not yet been completed and they are reported here solely as Historical Mineral Reserve Estimates)

On behalf of the Board,
"Les Kjosness"
President & Director

The Company's exploration program is under the supervision of R.D. Somerville, P. Eng., a Qualified Person under National Instrument 43-101. Mr. Somerville is Vice President and COO of Golden Arch Resources Ltd.

Golden Arch Resources Ltd. is a metals, oil, and gas and exploration company based in Vancouver, BC, Canada. Its principal assets are the Mildred Peak copper/gold/silver property located in Arizona, the Wakefield Lakes zinc project in Saskatchewan and the Abbott/Wagner silver/lead/zinc property in British Columbia.
